

Local Foundations Partner in Support of MED25

Seattle International Foundation (SIF) and the McKinstry Charitable Foundation are pleased to announce their recent partnership of matching grant support for MED25, a not-for-profit focusing on improving access and delivery of quality health care services in the Western African village of Mbita, Kenya. This \$50,000 grant is an exciting example of collaboration between these Seattle-based foundations in support of global efforts which align with the missions of both organizations. "We are very pleased to partner with the Seattle International Foundation to increase our impact and support of MED25," says Dean Allen, CEO of McKinstry and originator of its foundation.

MED25 focuses on culturally appropriate medical services delivered in a region experiencing high incidents of malaria, HIV, water-borne illnesses and high infant mortality rates. This grant will fund the expansion of medical services at the Mbita clinic as well as significantly advance community health worker outreach.

SIF provides **direct financial support** to local non-profits working internationally. SIF supports poverty alleviation efforts around the globe, as well as enhancing Washington State's global development sector. The McKinstry Charitable Foundation also supports the improvement of global health equity, access to quality education and social services.
